

**A web survey with 1,345 Florida Power & Light customers responding was completed November 13-16, 2008.**

## **Top 4 criteria in route selection process**

- **Customers ranked, in order of importance, the top 4 factors FPL should consider when selecting where to place additional transmission lines. They are:**
  - Proximity to residential neighborhoods
  - Number of properties or property owners the line crosses
  - Proximity to school properties
  - Opportunities to locate together with other linear facilities such as electrical lines, railroads, major roads or pipelines

**FPL considered the feedback we received and incorporated it into our route selection process**
