

Program Overview

THE ENERGIZED GUYZ ((LIVESTREAM SPECIAL))

ONLINE SHOW & E-LEARNING PACKAGE!

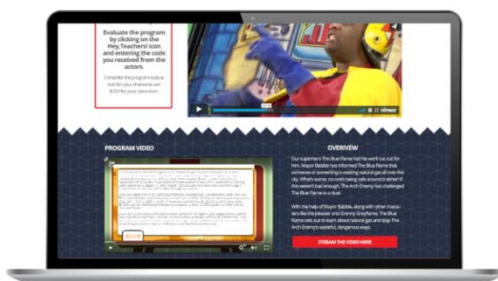

Educational Concepts

- What energy is
- The uses of energy
- How energy is wasted
- How we conserve energy

This 35-minute show presents an online-accessible lesson in energy conservation. Three professionally filmed sketches (introduced by a live host) will lead classrooms on an interactive and educational superhero adventure.

The story follows Nikki Neutron and her mission to stop Vivica Voltage from activating an energy-wasting device. Performances are catered toward lower and upper elementary learning levels, with the show for grades K-2 featuring puppetry and a sing-along, and the show for grades 3-6 featuring in-depth discussion questions. Both versions prompt students to consider how we can use energy wisely.

Students and teachers will also have access to a Q&A with the host, and an exclusive e-learning package that includes e-books and graphic novels, games, quizzes and lesson plans for the classroom that reinforce concepts from the show.
