

WHAT TO EXPECT ON INSTALLATION DAY

Use this checklist to know exactly what will happen during your installation. Make sure your vehicle is present so your electrician can test the charger and confirm it works properly with your specific model.

ARRIVAL AND PLANNING

☐ Meet your electrician

An FPL certified electrician will complete your installation in accordance with all local safety codes.

☐ Confirm charger location

Equipment-only: Your new charger will be hardwired at the location of your existing charger or existing 240-volt outlet.

Full installation: Your new charger will be installed within 10 feet of your electrical panel.

INSTALLATION AND SETUP

☐ Install your charger

Your charger will be installed at a recommended height for safe and convenient use.

☐ Complete safe electrical connection

Your charger will be hardwired directly to your home's electrical system.

Note: Plug-in installations are not supported. Any existing 240-volt outlet plug connection will be removed.

☐ Set up charging equipment

A cable holder (holster) will be installed to keep your charging connector secure and off the ground.

☐ Activate your charger

The electrician will power on the charger with the breaker and confirm it is commissioning normally.

APP SETUP AND WALKTHROUGH

☐ Set up your FPL EVolution app

The electrician will walk you through the app to complete setup and manage your charging. Ensure push notifications are enabled to receive timely alerts and updates.

- » Create your account
- » Complete charger onboarding
- » Add your vehicle's make and model
- » Access program features

☐ Learn how it works

You'll receive an overview of:

- » How to plug in your vehicle
- » What the charger indicator lights mean
- » Default setting: Off-peak charging

TESTING AND GO-LIVE

☐ Test your charger

A test charge will be performed with your vehicle to ensure everything is working properly.

☐ Start charging

After installation, testing and onboarding, your charger is ready for everyday use – starting the same day.
