

FPL Twin Lakes Solar Energy Center

Putnam County

The FPL Twin Lakes Solar Energy Center, which started operations in 2020, is creating an even brighter future for Putnam County. Florida Power & Light Company continues to advance solar cost-effectively while keeping customer bills among the lowest in the nation. We're proud to have universal solar in Interlachen.

Location: 101 Clouds Ave., Interlachen, FL 32148

FPL Twin Lakes Solar Energy Center by the numbers

283,770 photovoltaic solar panels

74.5 megawatts of clean, emissions-free energy

Powering about **15,000** homes annually with low-cost, renewable energy

Emissions reduction equivalent to removing **14,000** cars from the road each year

Solar site located on a **858-acre** property

Serving Putnam County's approximately **21,000** FPL customers and beyond

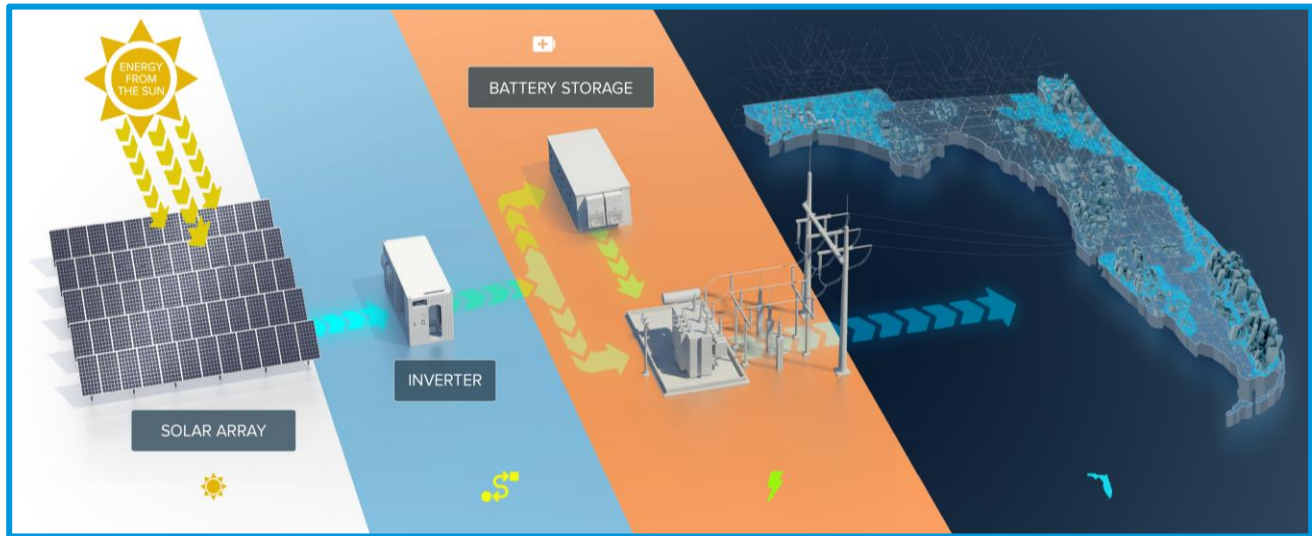

FPL contributed more than **\$5.7MM** in tax revenue to Putnam County in 2021

FPL's Commitment to Putnam County

Horizon was FPL's first solar energy center in Alachua and Putnam Counties, and was joined in 2018 by the Coral Farms Solar Energy Center in Putnam County. In 2019, the FPL Twin Lakes Solar Energy Center opened in Putnam County's Interlachen. Together, FPL has installed nearly one million solar panels in Alachua and Putnam Counties.

How a Solar Energy Center Works

Community Solar

FPL SolarTogether is the largest community solar program in the country. It gives all FPL customers the opportunity to enjoy the benefits of solar no matter where they live or whether they rent or own their home or business. For a low monthly charge, customers receive the benefits of their portion of the energy generated at our solar energy centers in the form of monthly credits on their FPL bill. Over time, credits increase and lower the program participants' bills.

Florida's Energy Landscape is Bright

Florida Power & Light Company offers America's best energy value with the cleanest, most reliable energy at a price that's one of the lowest in the country. The company has a groundbreaking Real Zero goal of eliminating carbon emissions from our power plant fleet by no later than 2045. We plan to achieve Real Zero with a diverse mix of solar, batteries, existing nuclear, green hydrogen and other renewable sources. And, as we work toward Real Zero, we intend to keep customer bills well below the national average, just as they've been for more than a decade.
