

Advancing Florida's Clean Energy Future

At FPL, we're taking charge of the future, today. By building one of the largest fast charging networks in the state, powered by clean, reliable energy from America's most intelligent grid, we're getting Florida ready for the EV revolution.

Renewable energy is helping fuel this revolution as we continue the nation's largest solar expansion. In fact, we're on track to reach our goal of installing 30 million solar panels by 2025, five years early, with even more solar coming soon.

And, you can count on solar energy even when the sun's not shining thanks to the world's largest integrated solar battery storage facility. The Manatee Energy Storage Center can store the power equivalent of 100 million smart phone batteries.

We remain committed to providing customers with America's best energy value while lighting the way toward a clean energy future Florida deserves.

Time-of-use peak hours change in April

If your business is on the standard time-of-use rate, don't forget on-peak hours have shifted to follow the annual schedule.

From April 1 to Oct. 31, on-peak hours are Monday through Friday from noon to 9 p.m. ET/ 11 a.m to 8 p.m. CT, excluding Memorial Day, Independence Day and Labor Day. To learn more about time-of-use or other rates, visit: [» FPL.com/TOU](https://www.fpl.com/TOU)

Ready for spring trimming?

Please remember to stay safe and stay far away from power lines during “spring trimming” season. Property owners are responsible for safely maintaining their trees and vegetation on their property and keeping them away from power lines. Never trim vegetation that has grown near a power line but hire a qualified, specially trained line-clearing professional to do the job. Stay safe. Always keep yourself and any object you are touching at least 10 feet from neighborhood power lines and at least 30 feet from larger lines.

For more information, visit: [» FPL.com/trees](https://www.fpl.com/trees)

Where does your energy come from?

FPL’s power comes from a variety of sources, including clean, U.S.-produced natural gas and emissions-free nuclear and solar. Today we’re taking steps to substantially increase our investment in cost-effective solar while eliminating our use of coal from Florida.

Our latest fuel mix compared to the rest of the nation:

FUEL	FPL ¹	U.S. ²
Natural Gas	67.4%	38.3%
Nuclear	19.6%	18.9%
Solar	4.1%	2.8%
Purchased Power	6.1%	N/A
Coal	2.7% ⁽³⁾	21.8%
Oil	0.1%	0.5%
Wind	N/A	9.2%
Hydroelectric	N/A	6.3%
Other renewables	N/A	1.8%
Other	N/A	0.4%

¹ Sources of electricity generation for the 12 months between Jan. 2021 and Dec. 2021

² Major energy sources and percent share of total U.S. electricity generation in 2021 (preliminary data as of Feb. 2022)

³ Coal generation is from units outside the state of Florida
