

## FPL has a storm plan, do you?

---

We prepare year-round by making ongoing investments toward a more storm-resilient energy grid. Our storm plan involves strategically building a stronger system, including:

- » Strengthening transmission and main power lines, including those that serve critical community facilities.
- » Installing self-healing smart grid technology.
- » Proactively converting more neighborhood power lines underground.
- » Using technology to identify and address potential areas of concern – especially vegetation near power lines, a leading cause of outages.

While no grid can be stormproof, these investments help limit outage times associated with severe weather events and reduce restoration costs, while also improving overall reliability for customers. Just as we're prepared for storm season, we encourage you to make sure your family is prepared, too.

- » Visit [FPL.com/Storm](https://www.fpl.com/storm) for resources to help you develop your storm plan.

## Stay safe, stay clear of power lines when picking fruit

---

NEVER trim or pick fruit around power lines. Hire qualified, line-clearing professionals for trimming near power lines and always keep yourself and any object you are holding or standing on – such as tools and ladders – at least 10 ft. away from power lines. Touching a power line directly or with a tool can seriously hurt you OR be fatal.

- » Visit [FPL.com/Trees](https://www.fpl.com/trees) for more safety tips.

## FPL's Care to Share® program is here to help

---

FPL Care to Share®: Helping those in need. Funded by FPL employees, shareholders, and caring customers. Assistance for individuals and families facing financial hardships, including hurricane-related electric repairs.

- » Donate or apply at [FPL.com/Help](https://www.fpl.com/help).

## Be on the lookout for scams

Watch out for utility scams in Florida, especially before or after natural disasters. Be cautious of callers demanding payment methods FPL doesn't accept like prepaid cards, cryptocurrency, or wire transfers through services such as MoneyPak, Zelle, or Venmo. If pressured for immediate payment, hang up and verify by calling the number on your FPL bill.

» Learn more at [FPL.com/protect](https://www.fpl.com/protect).

## Streetlights: What you should know

To report a problem, visit [FPL.com/streetlight](https://www.fpl.com/streetlight). Be ready to provide:

- » Streetlight's location or 11-digit pole number
- » Problem description
- » Your contact info (name, address, email, or phone number)

Remember:

- » Some streetlights are maintained by local municipalities or homeowner associations – not FPL.
- » We intentionally turn off some streetlights near beaches during sea turtle nesting season to avoid disorienting the turtles.

In compliance with Florida law, we annually publish these procedures for customers and the public to know how to report inoperative or malfunctioning streetlights.

## Where does your energy come from?

The power FPL delivers to you comes from a variety of sources, including U.S.-produced natural gas and safe, reliable nuclear energy. We also continue to make cost-effective investments in solar energy to drive down fuel costs for customers. Our latest generation mix compared to the rest of the nation:

GENERATION SOURCE	FPL <sup>1</sup>	U.S. <sup>2</sup>
Natural Gas	66.6%	40.8%
Nuclear	19.1%	17.7%
Solar	11.2%	6.7%
Purchased Power	2.7%	N/A
Coal	0.3% <sup>3</sup>	16.6%
Oil	>0.1%	0.3%
Other	N/A	17.9%

<sup>1</sup> Sources of electricity generation for the 12 months between April 2025 and March 2026.

<sup>2</sup> Sources of U.S. electricity generation for 2025 from U.S. Energy Information Administration.

<sup>3</sup> Coal generation is from units outside of Florida.
