

Energy-saving tools for your business

We offer a range of programs to help you save energy and money.

Business Energy Evaluation

- » On-site energy audit and usage analysis
- » Energy Expert delivers energy insights, identifies potential savings opportunities and provides tailored energy solutions, incentives and resources

Online Business Energy Manager

- » Fast online energy analysis
- » Track, analysis, and control business energy usage
- » Take energy survey for customized and personalized recommendations at **FPL.com/BEM**

Business On Call^{®*}

- » Enroll to allow FPL to temporarily turn off A/C when absolutely needed
- » A/C interruptions only for short periods when necessary
- » Receive monthly bill credit for participating, even if not activated

Business Lighting

- » Rebates for upgrading to high-efficiency lighting

For more information

- » Visit **FPL.com/BizPrograms**
- » Call account manager or business customer care at **800-FPL-2434 (800-375-2434)**

** Program unavailable for Northwest Florida customers*

Resale of electric service prohibited

The Florida Administrative Code prohibits the resale of electricity for a profit. The actual cost of electricity billed by FPL may be reasonably allocated among tenants, lessees and other entities as long as no profit is made.

EMF: Understanding the Science

Electric and magnetic fields (EMF) are created wherever electricity exists or flows; this includes the wiring in our homes and schools, power lines and the electric equipment and devices we use at work and home. Research has been conducted by leading U.S. and international scientific organizations. None have found that exposure to EMF causes or contributes to any type of cancer or any other disease or illness.

Where does your energy come from?

The power FPL delivers to you comes from a variety of sources, including U.S.-produced natural gas and safe, reliable nuclear energy. We also continue to make cost-effective investments in solar energy to drive down fuel costs for customers. Our latest generation mix compared to the rest of the nation:

GENERATION SOURCE	FPL ¹	U.S. ²
Natural Gas	67.8%	40.8%
Nuclear	17.7%	17.7%
Solar	11.7%	6.7%
Purchased Power	2.4%	N/A
Coal	0.4% ³	16.6%
Oil	>0.1%	0.3%
Other	N/A	17.9%

¹ Sources of electricity generation for the 12 months between August 2025 and July 2026.

² Sources of U.S. electricity generation for 2025 from U.S. Energy Information Administration.

³ Coal generation is from units outside of Florida.
