^{*}Water elevation estimated from aerial survey

^{**}Elevation and depth of CCR includes the area where CCR is being actively placed and compacted per the approved closure plan.

^{***}Depths, elevations and storage capacity are estimates derived by qualified personnel from available information and do not include the area above the original CCR elevation where CCR is being placed and compacted per the approved closure plan, e.g., the storage capacity does not include placed and compacted CCR.

^{****} Volume of CCR does not include CCR that is being placed and compacted per the approved closure plan because it is not considered impounded.

Based on the results of my inspection and review of the data provided, it is my professional opinion that the report has been completed in accordance with 40 CFR 257.83(b).
